

## April Meeting Is All About the Strokes, Folks! Becky Way to Demo Pet Portraits

OPS member Becky Way will give us some tips on doing pet portraits during our April meeting next Monday evening. If you have a photo of a hairy dog, bring it with you and she will use it for the demo.

Becky has been painting in pastel since 1978. Her pastel paintings are painted with mostly Terry Ludwig Pastels on U-Art or Wallis paper (all archival). Since 2016, she has been painting K9s, which have become her favorite subjects.

She is currently represented by Paseo Artworks Gallery in Oklahoma City. Becky teaches painting and drawing workshops in Oklahoma, Colorado and Texas, and does many demos for regional art groups. She is a member of the Oklahoma Pastel Society, OVAC, and Oklahoma Art Guild.

Becky paints in her studio every day at Sundance Airpark in Oklahoma City. She's also a pilot and enjoys flying with her husband to small air fields close by (and not so close by), to find new things to draw and paint, such as aerals.

Becky is featured in "Best of Pastel Artists in America," Volume II (pages 115-116).

Upcoming Events & Workshops –Page 3

# Tips from Dale Martin's March Demo

- Dale uses gray paper for landscapes and light tan for portraits.
- He buys smooth matboard in whatever color he wants and coats it with Art Spectrum clear primer — 50% thinned with water, 2 coats, 'X' strokes.
- Blocks in with vine charcoal. Establishes his darks and lights first with the charcoal.
- He usually doesn't use a fixative. The only exception is if he has really fine detail that he doesn't want to drag his hand through.
- He used purple for the upper sky and then rubbed it in.
- He establishes his darkest dark and lightest light with pastels first.
- Dale uses mostly Rembrandts (but doesn't like their new darks) and some Unisons.
- He mixed purple with turquoise for a nice gray sky color. Can be either warm or cool.
- He spends a lot of time on the sky, creating some leading of the eye, making an "S" in the sky.
- He smudges the sky areas with his fingers.
- After the sky, he began developing background tree masses — ultramarine blue with dark green over it. Some peach, some drawing in of trunks, branches with a dark color. The peach makes sunlit trees.
- Peach, rust, blues for grasses.
- If your paper gets too full of pastel, brush off some with a stiff brush. Can they use a paper towel to rub off more.

## Upcoming Workshops

### Clive Tyler

- May 19 & 20, 2018, Oklahoma City, Oklahoma Pastel Society. Location to be announced.

### Lorenzo Chavez, P.A.P.A.

- October 12 – 14, 2018, Palo Duro Canyon, Texas, contact 806/354-8802, [www.amarilloartinstitute.org](http://www.amarilloartinstitute.org)
